Hyderabad, India

Summary

Computer Science Engineering student with hands-on experience in full-stack development, backend systems, REST API design, and machine learning applications. Skilled in building scalable web applications using React, Node.js, Express.js, FastAPI, MongoDB, and PostgreSQL. Experienced in developing AI-powered solutions, workflow automation systems, and real-time collaborative platforms, with strong foundations in Data Structures, Algorithms, IoT, and Edge Computing.

Education

B.Tech – Computer Science Engineering

Amrita Vishwa Vidyapeetham, Coimbatore

CGPA: 7.78

Currently in 7th Semester

Technical Skills

Languages: Python, C++, C, JavaScript, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, FastAPI, Socket.IO, TypeScript

Databases: MongoDB, PostgreSQL

Tools: Git, GitHub, Docker, Linux, Postman

Domains: Full-Stack Development, Machine Learning, IoT, Edge Computing, REST APIs, Data Structures & Algorithms

Work Experience

Software Development Intern – TRIBLI Deeptech Pvt. Ltd.

Apr 2026 – May 2026

- Designed and developed REST APIs supporting internal and client-facing workflows.
- Worked closely with clients during integration processes and technical follow-ups.
- Provided workflow explanations, API documentation, and deployment support.
- Assisted in testing, debugging, and maintaining software modules across multiple projects.

SDE And client managment Intern – SiliconWireless Pvt.

Apr 2025 – June 2025

- Developed and integrated APIs for communication between biometric devices and backend systems.
- Worked on facial recognition and fingerprint authentication workflows.
- Assisted in firmware testing, debugging, and validation of biometric security devices.
- Contributed to secure device communication and authentication mechanisms.

Projects

Digital Collaborative Canvas

Developed a real-time collaborative whiteboard using Socket.IO, TypeScript, Express.js, and MongoDB. Implemented live drawing synchronization, multi-user collaboration, persistent canvas storage, and scalable backend architecture for concurrent users.

Cyber Phishing Detection Platform

Built a phishing website detection platform using Random Forest Classifier, URL feature extraction, SHA-256 hashing, and secure data handling mechanisms. Applied cybersecurity concepts including encryption and CIA Triad principles to improve detection reliability.

Profile Search page for Tribli Deeptech Pvt. Ltd. (Proof of Concept)

Designed and developed a proof-of-concept workflow automation platform for managing client interactions, task assignments, and business process execution. Built RESTful backend services, implemented workflow orchestration logic, and explored scalable architecture patterns for enterprise workflow management.

Achievements & Leadership

- **AIverse Hackathon - Finalist (Anokha 2026)** — Developed a Retrieval-Augmented Generation (RAG) based AI system for funding decision simulation with explainable recommendations.
- **Hack101 Hackathon – 3rd Place** — Ranked among top-performing teams by solving real-world engineering challenges through rapid prototyping and problem solving.
- **Procession Head – CSE Department - 1st Place (Gokulashtami)** — Led planning, coordination, and execution of departmental activities for a university-wide cultural procession involving multiple teams.
- **Delegate (Honorable Mention) – Model United Nations** — Represented Revanth Reddy and proposed reforms aligned with NITI Aayog initiatives and UN Sustainable Development Goals (SDGs).
